

CRIF Commercial Bureau Rejection Audit & Fix Report

File Audited: NBF0000708_Commercial_16082026_20082026_144816_W2.txt | **Master Sheet:** CIC Commercial Data Master Sheet16th August, 2026.xlsx

1. Executive Summary & Root Cause Analysis

The submission file was rejected by CRIF High Mark Commercial Bureau Portal due to a combination of **wire-format segment delimiter mismatch (V3.9 vs V3.10)** and **semantic data discrepancies** in the accountant's Master Sheet. The bureau gateway validates weekly submissions (W2) against the **Commercial UCRF V3.10** specification. The table below summarizes the fatal rejection triggers and required corrections.

Category	Error / Rejection Reason	Bureau Impact	Required Fix
Structural (Wire Spec)	CR Segment Delimiter Count Mismatch Submitted file had 43 pipes (44 fields) instead of 44 pipes (45 fields).	FATAL Gateway parser rejection: invalid field count for V3.10.	Generate using Commercial UCRF V3.10 format profile in CIC Export tool (emits 44 pipes).
Entity Identification	Dummy DUNS '999999999' Emitted DUNS fields in AS, RS, and GS were populated with dummy '999999999'.	FATAL / ERROR CRIF rejects fake/invalid D&B; organization numbers.	Leave DUNS fields blank () when entity has no real D&B; DUNS number.
Relationship Semantics	Relationship Code Mismatch (Col Z) Accountant entered '12'. In CRIF catalogue, 12 = 'Subsidiary Company', but related person is an individual director.	DATA REJECTION Entity type conflict (Individual person cannot be a Subsidiary Company).	Use CRIF Code 56 for 'Other Director' or 51 for 'Promoter Director'.
Director / Guarantor Data	Conflicting DOB for Same PAN Row 4 (Ramesh Datla, PAN AANPD9781G) has DOB 28/09/2002 in RS and 25/10/1961 in GS.	FATAL ENTITY MISMATCH Bureau rejects conflicting demographic profiles for same PAN.	Harmonize Date of Birth in Column AC and Column AQ to actual birth date (25/10/1961).
Geographic / State Codes	State Code Mismatch (RS Segment) Hyderabad PIN 500045/500033 listed as 'Andhra Pradesh' (Code 02) instead of Telangana (Code 36).	WARNING / AUDIT PIN-to-State geographic validation failure.	Update address text to Telangana or specify State Code 36.

2. Technical Breakdown: CR Delimiter Count & DUNS Rules

A. The CR Segment Delimiter Rule (V3.10 Standard):
Under CRIF High Mark Commercial UCRF V3.10 (§7.5), the Credit Facility (CR) segment consists of exactly **45 fields (44 pipe delimiters)**. The legacy V3.9 layout had 44 fields (43 pipes) terminating at ufceAmount. V3.10 adds Field 45 (ufceDate). When the file header contains cycle code W2, the bureau requires full V3.10 field alignment:
Rejected CR (43 pipes): CR|1983201000162|...|01|||||||0||00|||||||
Compliant CR (44 pipes): CR|1983201000162|...|01|||||||0||00|||||||

B. DUNS Number Specification:
DUNS numbers are 9-digit identifiers issued exclusively by Dun & Bradstreet. In previous manual exports, dummy 999999999 values were inserted into AS Field 3, RS Field 2, and GS Field 2. Per CRIF specifications, if an entity has no official D&B; DUNS, the field must remain completely empty (||).

3. Master Sheet Row-by-Row Action Plan for Accountant

The accountant should make the following specific corrections in **CIC Commercial Data Master Sheet16th August, 2026.xlsx** before generating the final submission file:

Row #	Borrower / Account	Column / Field	Current Value	Corrected Value	Reason for Correction
All Rows (2, 3, 4, 5)	VIRINCHI, VIVO BIO, ELICO, VIRINCHI HEALTH	Col Z (Relationship)	12	56 (or select 'Other Director')	Code 12 = Subsidiary Company. Individual directors must use Code 56 (Other Director) or 51 (Promoter Director).
Row 4	ELICO LIMITED (Acct: 10558726624)	Col AC vs Col AQ (Director vs Guarantor DOB)	Col AC: 28092002 Col AQ: 25101961	Both: 25101961	Ramesh Datla (PAN AANPD9781G) is listed with DOB 2002 as Director and 1961 as Guarantor. Conflicting DOB causes fatal bureau entity mismatch.
Row 2, 4, 5	Maddala Veera Srinivasa Rao & Ramesh Datla	Col AE (Related Person Address)	Text says 'Andhra Pradesh-500045'	Text should say 'Telangana - 500045'	Jubilee Hills PIN 500045/500033 is in Telangana (State Code 36). Text discrepancy causes State Code 02 to be parsed.
Row 2 & 4	VIRINCHI LIMITED & ELICO LIMITED	Col A & Col AR (Company Name / PAN)	Trailing space in name/PAN	Trim spaces	'VIRINCHI LIMITED ' and PAN 'AANPD9781G ' contain trailing spaces. Clean extra whitespace to prevent format shift.

4. Step-by-Step Instructions to Generate Valid Submission File

1. **Correct Master Sheet:** Update the 4 items listed in the table above in Excel and save the file.
2. **Open CIC Converter App:** Launch CIC Converter (Gated) on your computer.
3. **Select Format:** In the Format dropdown, ensure '**Commercial UCRF V3.10**' (default) is selected.
4. **Verify Details:** Enter Member ID NBF0000708, select Reporting Cycle **W2 (16th Aug)**.
5. **Click Generate:** Click '**Generate submission file**' to save the verified .txt file.
6. **Validate Before Upload:** You can also switch to the **Validator** tab and click '*Run validation on Master Sheet*' to confirm 0 errors before portal submission.
