

CRIF HIGH MARK CONSUMER SUBMISSION AUDIT REPORT

Technical Rejection Analysis ('Reason-CSV file in TUDF') & Accountant Action Items

Reporting Member ID: 024FP04147	Member Short Name: VINZOLCFL	Reporting Cycle Date: 16-08-2026
Source Master Sheet: 024FP04147_16082026_17082026_145520.xlsx	Total Borrowers: 17 Loans (Rows 11-27)	File Creation Date: 20-08-2026
Rejection Reason from Portal: Reason-CSV file in TUDF	Submitted Files Audited: .tXT & .tudf	Target Output Format: Canonical TUDF (.tudf)

1. Executive Summary & Why the Portal Rejected the File

CRIF High Mark rejected the submission with the error: 'Reason-CSV file in TUDF'. The audit reveals that the uploaded .tudf file is byte-for-byte identical to the raw flat file. **Simply renaming a flat text file's extension to .tudf does not convert it into TUDF format.** The bureau gateway expects structured, self-describing TLV segment tags (PN03N01, ID03I01, PA03A01, TL04T00, ES02**TRLR). Furthermore, **two mandatory bureau fields were omitted in the Excel sheet**, preventing successful validation.

#	Issue Type	Location / Column	What Was Found	Required Fix from Accountant	Severity
1	Format Mismatch	Internal File Encoding	Raw flat text renamed to .tudf without segment tags	Export using the engine's Canonical TUDF format (Coded-Field TLV with PN, ID, PA, TL tags).	BLOCKER
2	Mandatory Field Missing	Col AZ (Col 52) Suit Filed / Wilful Default	BLANK across all 17 rows in Excel	Enter value '00' (No Suit Filed) for all rows 11 to 27.	CRITICAL
3	Mandatory Field Missing	Col BG (Col 59) Rate of Interest	BLANK across all 17 rows in Excel	Enter sanctioned annual interest rate (e.g. 12, 18, 24) in Col BG.	CRITICAL
4	Filename Violation	File Name & Extension	Previous upload had ' (1)' and '.tXT'	Save strictly as 024FP04147_16082026_20082026_145520.tudf (no copy tags, lowercase extension).	BLOCKER
5	Data Hygiene	Col A (Name) & Col X (Addr)	Trailing spaces in 5 names & 5 addresses	Trim whitespace before/after names & address strings.	WARNING

2. Technical Format Comparison: Why Bureau Gateway Rejects Flat Files

Credit bureaus require a specific internal encoding for the TUDF portal upload slot. Below is the structural difference between what was submitted and what is required:

Rejected Submission (Flat / CSV-like Concatenation):	Required Format (Canonical TUDF Coded-Field Stream):
TUDF024FP04147 VINZOLCFL... DANTANI BHARATBHAI060819932BRWPD8211J... (Raw concatenated strings, no segment headers, no field tags. Bureau parser flags this as 'CSV file in TUDF'.)	TUDF12024FP04147...PN03N010118DANTANI BHARATBHAI0708060819930801 2ID03I010102010210BRWPD8211JPT03T01...PA03A01...TL04T00...ES02**TRLR (Tagged TLV segments with exact length prefixes and End-of-Subject trailer.)

3. Row-by-Row Excel Correction Matrix (All 17 Accounts)

The accountant must enter the missing values in **Column AZ** (Suit Filed) and **Column BG** (Rate of Interest) in the Master Sheet before regenerating:

Row	Borrower Name	Account Number	Type / Own	Col AZ (Suit)	Col BG (ROI)	Col BH (Tenure)	Col BI (EMI)

4. Step-by-Step Instructions for Accountant & Operations

- **Step 1 — Open Master Sheet:** Open 024FP04147_16082026_17082026_145520.xlsx in Microsoft Excel.
- **Step 2 — Populate Column AZ (Suit Filed):** Go to Column AZ (Column 52) and enter value 00 for all data rows 11 to 27.
- **Step 3 — Populate Column BG (Rate of Interest):** Go to Column BG (Column 59) and enter the annual interest rate (e.g. 12, 18, 24) as per loan agreements for all rows 11 to 27.
- **Step 4 — Clean Whitespace:** Trim trailing spaces in Column A (Names) for rows 11, 12, 18, 25, 26 and Column X (Addresses) for rows 15, 16, 17, 19, 27.
- **Step 5 — Export as Canonical TUDF:** Generate the output file using the **TUDF format profile** (consumer-ucrf12) so that all PN, ID, PT, PA, TL tags are generated.
- **Step 6 — Verify & Upload:** Confirm the filename is strictly 024FP04147_16082026_20082026_145520.tudf and upload to the CRIF High Mark portal.
